PROFESSIONAL SUMMARY

MCA graduate with hands-on experience in backend software development, RESTful API development, and AI-powered web applications. Proficient in Python, Java, Flask, MySQL, MongoDB, and software engineering principles, with experience building scalable backend systems. Strong foundation in Object-Oriented Programming, Data Structures, SDLC, debugging, database optimization, and clean, maintainable code.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, HTML5, CSS3

Frameworks & Technologies: Flask, REST APIs, JSON, JWT Authentication, OOP

Databases: MySQL, MongoDB

Developer Tools: Git, GitHub, VS Code, Power BI

Core Concepts: Data Structures & Algorithms, SDLC, Software Testing, Debugging, SQL Optimization, System Design Fundamentals, Agile Development

PROFESSIONAL EXPERIENCE

Software Engineer Intern | AgileSoftLaps

Mar 2026 – May 2026

- Developed scalable backend modules and RESTful APIs using **Python, Flask, and MySQL** for web applications.
- Applied **Object-Oriented Programming (OOP)** principles to build reusable and maintainable software components.
- Optimized SQL queries, performed software testing and debugging, improving backend reliability and application performance.
- Collaborated throughout the SDLC using **Git/GitHub**, contributing to development, testing, deployment, and code reviews.

PROJECTS

AI-Powered Intelligent Recruitment Automation System

React.js | Flask | Python | MongoDB

- Developed a full-stack AI recruitment platform for resume screening and candidate management.
- Implemented AI-based resume matching using **TF-IDF** and **Cosine Similarity** algorithms.
- Built secure REST APIs and automated candidate ranking with email notifications, reducing manual screening effort by **40%**.
- Optimized backend APIs and database operations for improved performance and scalability.

Social Media Stress Prediction

Python | Flask | Scikit-learn

- Developed an ML-powered web application for real-time stress prediction using Flask REST APIs.
- Integrated machine learning models with backend services and optimized application performance through testing and debugging.
- Improved maintainability by following modular software engineering and clean coding practices.

EDUCATION

Master of Computer Applications (MCA)

Christ College of Engineering and Technology, Puducherry | **CGPA: 8.80 | 2024–2026**

Bachelor of Computer Applications (BCA)

Rajiv Gandhi Arts & Science College, Puducherry | **CGPA: 6.98 | 2018–2021**

CERTIFICATIONS

- Programming in Python
- Power BI for Business Professionals (Infosys)
